Main Duties*: <ol style="list-style-type: none"> 1. To be responsible for the development, organisation and supervision of the learning of Pharmacology including how drugs and medicines affect biological systems within the human body and drug interactions to students on relevant degree programmes across College of Health and Science and / or the University. 2. To contribute to the delivery of a high-quality student experience for students on relevant degree programmes, including developing new courses, working with the appropriate Leads to ensure courses are supported in respect of relevant disciplines. 3. In consultation with the appropriate Course Lead, to design and produce learning resources in pharmacology sciences, maximising the use of technology, and demonstrating appropriate and innovative pedagogic approaches to support learning including safe prescribing to the specified Medical Licensing Assessment, Prescribing Safely Assessment or other required professional standards. 4. To make a significant contribution to teaching and assessments including preparing students for any national prescribing assessments. 5. To undertake the full range of teaching duties, module leadership, research project supervision and other administrative duties commensurate with the post and grade 6. To work with undergraduate and postgraduate courses across the College of Health and Science to ensure the successful delivery of biomedical and pharmacological sciences and to ensure that interdisciplinary learning is embedded. 	

7. To contribute to the assessment process for students including the setting, marking and moderation of work, individually or collectively as part of a team in accordance with quality assurance procedures, including taking on assessment leadership in due course.
8. To take part in the day-to-day management of teaching and learning and to support the continued development of pharmacology and safe prescribing within relevant programmes.
9. To engage in research and scholarship, disseminating findings through conference presentations and journal articles, books, book chapters and other forms appropriate to the discipline.
10. To supervise doctoral students in their discipline as appropriate.
11. To develop and / or collaborate on funding bids for research and / or knowledge exchange.
12. To develop the impact of their research, through engagement with key stakeholders and research users / beneficiaries.
13. To participate in the facilitation of problem-based learning as required.
14. To fulfil a highly effective personal academic tutor role, actively contributing to the process of monitoring and profiling students across the School
15. To carry out academic administrative work and participate in relevant committees within the School and College.
16. To participate in the recruitment of students, including selection events and open days.
17. To participate fully in the life of the School and carry out any other reasonable duties as requested by the Dean of School or their nominee.
18. Maintain personal and professional development to meet the changing demands of the job; participate in appropriate training activities and encourage and support staff in their development and training.
19. Take steps to ensure and enhance personal health, safety, and well-being and that of other staff and students.
20. Carry out these duties in a manner that promotes equality of opportunity and supports diversity and inclusion and takes into account the University's commitment to environmentally sustainable ways of working.

*The above does not represent an exhaustive list of duties associated with this role.

Selection methods:

Shortlisted candidates will be asked to deliver a presentation and a teaching session, followed by a formal panel interview. The presentation and teaching briefs are as follows:

Presentation:

Please deliver a 10-minute presentation detailing how you would develop and deliver Pharmacology within the TCMS MBChB curriculum (with reference to GMC Outcomes for Graduates).

Teaching session:

Please deliver a 20- minute teaching session on an aspect of pharmacology that is appropriate for Level 5 (Year 1) students on healthcare programme.
